

Become a Graduate Research Scholar for 2017-2018

The School of Architecture has completed its review of research abstracts submitted by our faculty for possible GRS participation. The selected abstracts are available for your consideration.

If you are interested in participating in the GRS program, please review the abstracts to determine first, which ones most closely align with your academic interests and second, which would benefit from your specific qualifications and skill sets.

Select a total of (3) research projects and list in ranked-order. For each selection, please give a detailed explanation for your choice and how you are best qualified to participate in the project. *Do not include projects noted as having been already filled in your ranked order.*

Emphasis should be placed on being as specific as possible. Faculty will be given the list of interested students and select their GRS scholar(s) from that list.

We need your top three selections by Monday, January 23, by 5pm.

Please note abstracts labeled "Position Filled," meaning that students have already been selected. If a "filled" projects still interests you, feel free to email the applicable faculty member to let them know.

A brief review of the program and its parameters:

***The term of the GRS assignment is from January 2017 to January 2018.

***GRS assignments are for (1) project per year.

***GRS assignments are paid positions.

***GRS assignments are limited to 120 hours per year.

- Selection form is on page 2 -

Completed Selection Forms must be submitted to Programs Coordinator Eric Moore
Emailed to ericjmoo@usc.edu or dropped off at HAR 210 by Monday, 1/23/17 by 5pm
