Our mission is to provide design services to underserved communities and/or organizations. Typically, our designs are then built by others.

Current project is a “pocket park” at Vermont/Gage (with a $1 million budget!) to contain: child play equipment, adult exercise equipment, drought-tolerant landscaping, custom benches, planting screens and shade structures, and various hardscaping and pervious paving areas.

Commissioned by the LA City Department of Recreation and Parks. Design will be completed by the end of the Spring 2013 semester.

Past AfH-USC projects that have been built or are soon to be built projects include: Gilbert Lindsay Park renovation; Los Nietos Library interior design; Graham Library interior design.

Open to all years (undergraduate + graduate). Meet and work with students of all years with many different skills!

Work on projects that vary in scale from a school in Cambodia to a library in Los Angeles.

Kristina Lambros is the current president. Please contact her at klambros@usc.edu with questions or if interested in joining.

We are affiliated with AfH-LA (http://losangeles.architectureforhumanity.org).
